PROFILE

Dedicated software developer with expertise in Python, web technologies, and a strong grasp of Agile and interaction design principles.

Proven ability to deliver innovative solutions by combining technical skills with a deep understanding of user-centric design.

With a background from The Open University, I excel in transforming complex problems into intuitive applications.

Passionate about leveraging my knowledge in software development and design to contribute to impactful projects in a dynamic team environment.

Experience

PROJECTS:

JANUARY 2024

Independently developed a Python game and deployed it to itch.io.

JANUARY 2024

Developed a React application independently and deployed it to Netlify.

2021-2023

Completed multiple programming courses with Code First Girls, covering Python, Web Development, React, and JavaScript. Collaborated with team members via Slack and Teams to develop software products.
